

PASSION FOR PRODUCTS PASSION FOR PEOPLE

We all have a passion. Something deep inside that drives us. Something that makes us who we are. Something we love.

At Dalla Corte, we are devoted to coffee.

It's our purpose to create the best coffee machines to give you the power to make the perfect espresso.

Our driving focus is to deliver the simplest, most intuitive and highest quality solutions to allow our customers to make better coffee every day.

By providing you with the most advanced technology, we are bringing the most delicious coffee in your cup.

Our promise to you, is that we'll keep on improving by searching for new things to learn.

Your promise to us, is to always expect the very best from your espresso.

We are Dalla Corte. We are here to

LET'S BUILD YOUR COFFEE SHOP

Our machines are all equipped with amazing technologies, making them ideal for any kind of shop. What does your business need?

ENDLESS POSSIBILITIES ZERO LIMITS

FUTURISTIC DESIGN A machine with strong personality and an eye-catching design that highlights Dalla Corte's technological innovations and the barista's work, introducing him into a "zero limits" dimension to express himself.

FIND YOUR FLOW With the Fixed Water Flow, the flow rate is adjustable in grams per second directly on the digital touchscreens. Every single group can have a different flow rate - from 3 g/s to 9 g/s - fixed throughout the entire extraction.

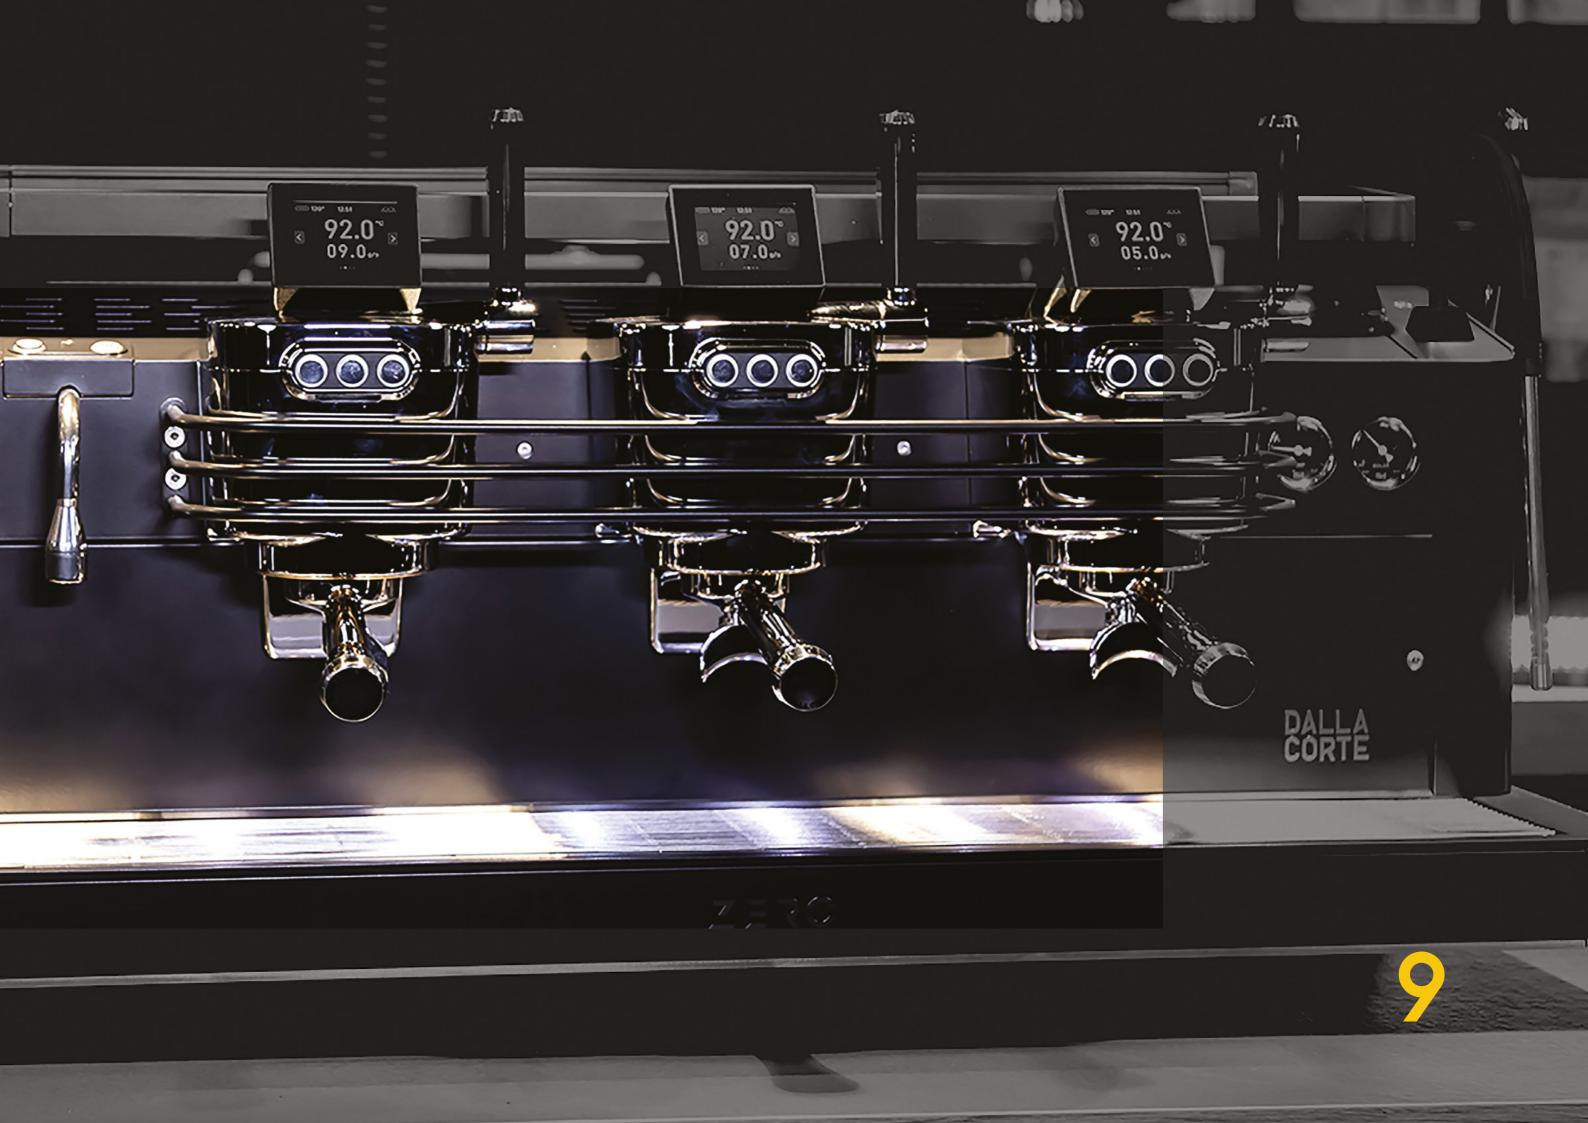

FREESTYLE YOUR EXTRACTION With the Freestyle Water Flow, each lever on the side of Zero's brewing units is provided with 4 steps, each step is pre-set to a specific flow rate (3-5-7-9 g/s). Welcome to a "zero limits" dimension.

HAVE A TASTE OF OUR FUTURE VISION

THE START OF A NEW ERA For the first time since its creation in 2001, the original patented multiboiler technology has been taken to the next level with Zero's new 0.75 lt groups. Year Zero starts now.

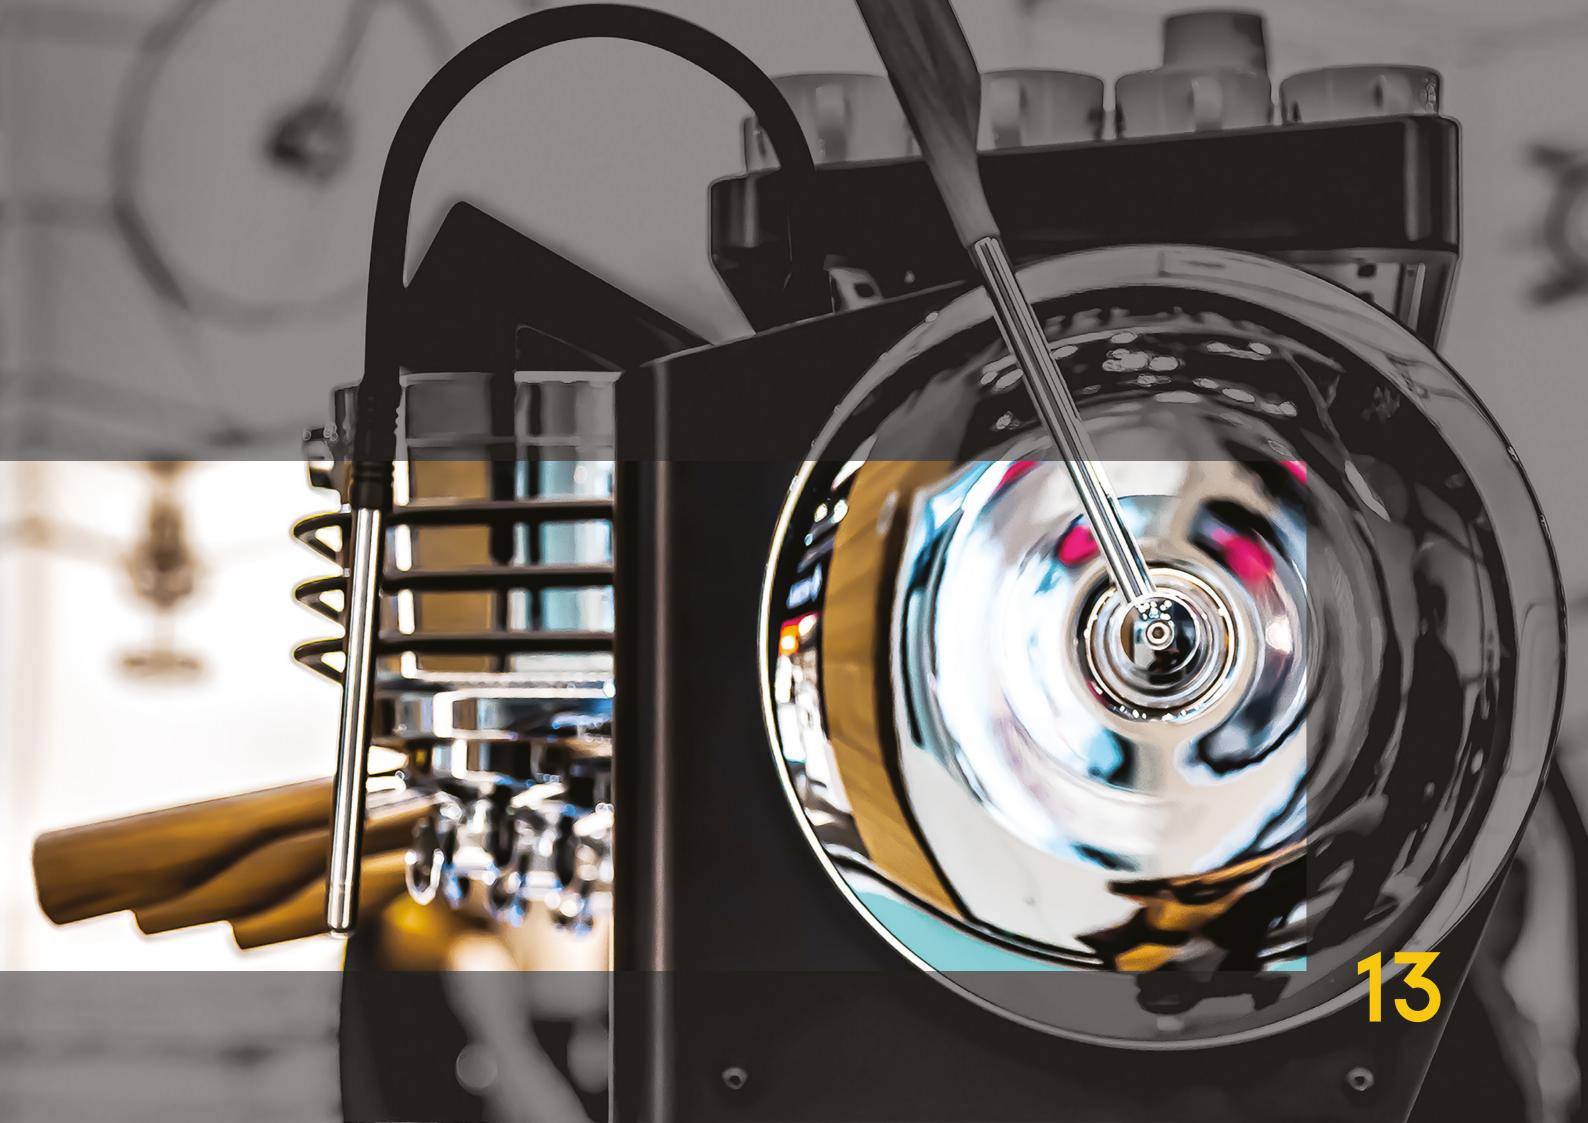

DIGITAL TOUCHSCREENS All functions are easily accessible with just a few touches; the most important settings are always visible on screen.

TAKE CENTRE STAGE A brand new design for the Dalla Corte Cool Touch steam wand, while still performing at the highest levels. This new version of the Cool Touch Steam Wand will be installed on all Zero Barista and Classic series. Because the best can't be optional.

IMPECCABLE PERFORMANCE

MAKE YOUR COFFEE ICONIC Icon is a reliable espresso machine that can make an excellent and consistent espresso over time, the answer to what businesses need during their busiest hours to provide impeccable results with minimum effort.

RELY ON THE DC SYSTEM The technologies of the DC system GCS, MCS and OCS, make Icon an ideal candidate for the Horeca market, where high turnover rates and frequent peak times during the day can really put quality to the test.

YOUR BRAND, YOUR ICON. Light lines and geometric cuts for the side panels formed by a single stainless-steel shell. On the back panel there's plenty of room for custom projects, thanks to a wide range of RAL colorations and special custom materials.

EXPAND YOUR **COFFEE MENU**

HOME BARISTA 2.0 Studio evolves into another version, Studio Aqua, now equipped with a hot water dispenser to expand the possibilities of the most demanding home baristas. Small size, ideal for a first-class coffee corner.

MORE RECIPES FOR YOUR HOME-CAFE' Thanks to the hot water tap, Studio Aqua meets the needs of those home baristas who want to quickly range from espresso to diluted drinks, such as a caffè Americano, or prefer to alternate their preparations with tea and infusions.

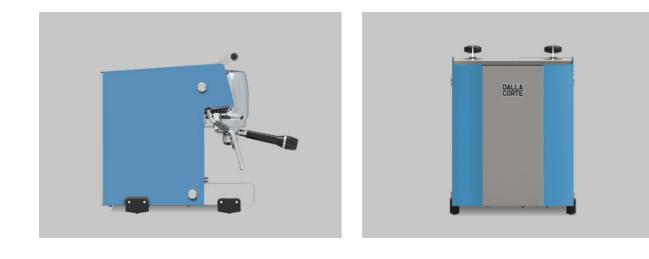

MORE THAN MEETS THE EYE Studio Aqua is also equipped with a bigger boiler for improved temperature stability. It connects to the water supply system and is equipped with a double pressure gauge for greater control.

TALLER HOPPER HANDS FREE FLAT BURRS 64mm BL

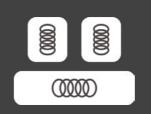

THIS IS HOW WE #MAKE & BETTER

The original independent - group - technology. Every single group and the boiler work independently from one another: this allows you to switch off the groups or the boiler when you don't need them, save energy and, most of all, maintain the temperature steady for every extraction. Our first innovation, a true and proper revolution for the entire industry.

All of our machines are standardly equipped with 54mm-diameter portafilters. During coffee extraction, with the same incoming pressure, the 54mm weighs much less on the coffee puck compared to the classic 58mm. With the same amount of coffee, the 54mm ensures a taller coffee cake: hot water will take longer to flow through the coffee ground and with less pressure. The result will be a richer coffee, full-bodied and with complex aromas.

We can proudly claim that we were the first commercial espresso machines manufacturers in the world to use new, certified materials - special brass alloys that considerably improve our multigroup machines' performance and that don't release heavy metals such as nickel, chromium or lead into the xwater*. Now, that's a challenge!

The total amount of extraction time is given by adding pre-infusion time and percolation time. With "pre-infusion time", we describe the moment when the water enters the extraction chamber (the space between the shower and the base of the coffee cake); once this space is filled up, we'll see the first drops of coffee coming out, and the so called "percolation phase" will start.

MULTIBOILER

54mm PORTAFILTER

LEAD FREE

EXTRACTION

DC SYSTEM

The DC System is a group of technologies thought for chains and coffee shops where there's a high staff-turnover-rate, created specifically to ensure a consistent result in the cup, for both espresso and milk-based-beverages. The DC System consists of the Grinder Control System (GCS), the Milk Control System (MCS) and the Online Control System (OCS).

GRINDER CONTROL SYSTEM - GCS

Through the GCS you can keep the grinding under control without any need for the operator to step in. By connecting DC One and DC Two to our espresso machines, the grinders will automatically change the grinding point, maintaining an ideal grind and ensuring perfect coffees. This is how we can guarantee an excellent quality at every extraction.

MILK CONTROL SYSTEM - MCS

MCS is an automatic steam wand that can guarantee perfect frothing with different types of milk. A temperature probe will automatically stop the steam when the milk reaches the optimal result that was previously set. To make the perfect cappuccino froth, fine- textured and creamy, pressing a button is all it takes.

ONLINE CONTROL SYSTEM - OCS

The OCS ensures remote control of the machine's parameters - all you need is internet access. With a smartphone, laptop or any other device, you can connect to your espresso machine and easily change the temperature of the single groups, set extraction doses, check on counters, timers, alarms and all basic parameters of your Dalla Corte. Whenever you want, wherever you like.

ENERGY SAVING

Reducing energy consumption while maintaining high performance levels? Yes, we can. The environment is our common heritage and we want to respect and preserve it. In our machines, you can use one single brewing group and turn off all the others – energy consumption is considerably lower, and so are operating costs.

When we talk about coffee extraction, flow is the amount of water - measured in grams per second -that is dispensed in a determined span of time and pours through the coffeecake. Different varieties of coffee require different water-flows, therefore, we need to be able to operate on the pre-infusion time to extract all of the coffee's organoleptic properties into the cup.

DIGITAL FLOW REGULATION - DFR

The exclusive and patented technology that allows you to control water flow in grams per second throughout the extraction, especially during the pre-infusion phase. With Mina you can profile the flow electronically, creating your own coffee recipes. While with Zero Barista you can use the freestyle mode by using the control lever, changing the coffee's acidity, sweetness and body.

Fixing the water flow is ideal to extract different selections of coffee on the same espresso machine, or to enhance different characteristics from the same coffee beans. On XT Barista each group is equipped with a manual flow regulator: use the dedicated key to fix the water flow to remain constant throughout the extraction. On Zero Barista you can set the flow in g/s directly from the digital screen on top of each group instead.

Through the app Dalla Corte Mina (available on App Store and Google Play), you can create new coffee profiles and save them in your personal collection. You can also operate on all the machine's parameters, enble or disable the GCS, MCS and energy-saving mode. Total control, in the palm of your hand.

On Zero and XT, you can view the weight of the coffee in the cup in real time, without any need for external scales. Through a control panel on top of each group, you can view the amount of water that was used for the whole process, and the exact weight of extracted liquid.

FIXED FLOW REGULATION

MINA APP

WEIGHT CONTROL

65mm FLAT BURRS

The 65mm flat burrs' exclusive design, specifically created for espresso, guarantees an ideal grind for any type of coffee. The one hundredth of a millimeter regulation, ensures an unprecedented precision, good coffee starts from the perfect grind.

COOL TOUCH STEAM WAND

You can have our steam wand's efficiency and a perfect milk cream without the risk of getting burnt. The double coating inside the wand prevents the external steel surface from overheating, without affecting the wand's performance.

CUSTOM VERSION

Our machines are available in different design combinations. Glass, wood, custom RAL colours, matt or shiny coating, decorated with airbrushed or laser finishes. A unique style that can suit the baristas personality or the coffeeshop's concept.

0.75 GROUP

The multiboiler has been the core technology of all Dalla Corte espresso machines since the very beginning. Over a decade later, we wanted to improve the independent group's capacity of the Zero from the original 0,5 lt to an increased 0,75 lt. Once again we #makeitbetter to meet our customers' needs.

CERTIFIED QUALITY

Used by millions of organizations around the globe, the world-standard reference for quality, ISO 9001, helps ensure that customers get good-quality products and services. Dalla Corte has certified the brand not only for the production of espresso machines and coffee grinders, but also for their installation, support, and maintenance.

OUR ACADEMY OFFICINA DALLA CORTE

#MakeltBetter

DA

MAKEit

A dynamic space in full Dalla Corte style to host coffee education courses, technical training on our espresso machines and events dedicated to the coffee world.

Always promoters of creativity and training, coffee education is one of Dalla Corte's main goals. With this training hub, we want to keep on spreading our live-learn-share values.

Coffee lovers, technicians, coffee professionals and not - you can find information on Officina Dalla Corte courses and events on the events section of dallacorte.com
